A Proposal on the use of Remedial Math Credits in the General Education Curriculum

**Proposed:** Neither MAT 100 nor MAT 100P shall be used to satisfy any of the general education competencies. Further neither MAT 100 nor MAT 100P shall be used to satisfy the “40 credits outside the major discipline” general education requirement.

**Rationale:** MAT 100 and MAT 100P are courses that repeat high school level algebra topics. The courses are offered to give students a refresher before taking college level courses. Neither of these course could be used to satisfy general education requirements prior to 2016.
